Education

University of Ottawa

Expected: Dec 2026

Bachelor of Applied Science in Software Engineering

Relevant Courses: *Data Structures, Algorithms, Operating Systems, Computer Architecture, Databases, Object-Oriented Programming, Quality Assurance, Design and Analysis of Algorithms, Programming Concepts with C++*

Experience

Statistics Canada

May 2025 - Sep 2025

Cloud Developer Intern | Python, Azure, Apache Spark, Microsoft Fabric

Ottawa, ON

- Developed a cloud-based ML training pipeline using **PySpark** and **MS Fabric** to automate text classification for statistical reporting
- Built a **FastText**-based ML model to classify business descriptions into number codes, increasing classification accuracy by **20%** and reducing manual effort
- Engineered a new system to ingest, clean, and consolidate CRA tax data into cumulative files using **PySpark**, enabling downstream ML and reporting workflows in **MS Fabric**
- Presented the executive stakeholders on the NAICS training/serving stack; delivered a live demo of Fabric pipelines, **MLFlow** model registry/lineage and aligned on next steps and secured approval.

Department of National Defence

Sep 2024 - Jan 2025

Full-Stack Developer Intern | Python, SQL, Docker

Ottawa, ON

- Revamped the data upload functionality of an internal forecasting tool, leveraging **Python** to improve file handling and user experience for **200+** employees
- Implemented database schema updates using Alembic and SQLAlchemy, reducing query execution times by **30%**
- Redesigned various UI in **Dash**, improving workflow efficiency and reducing file upload times by **30%**
- Achieved **95%+** code coverage by developing unit tests in **Pytest**, resulting in a **20%** reduction in production bugs
- Updated YAML based **CI/CD** pipelines to streamline deployment processes, improving build times by **15%**

MindBridge AI

Jan 2024 - May 2024

Data Analyst Intern | Python, Java, Excel

Ottawa, ON

- Ingested **50+** financial datasets weekly using **Python** and **Excel** to enable risk analysis, leading to a **67%** decrease in support ticket resolution times
- Launched scripts using **Pandas** and **NumPy** to format and preprocess datasets, standardizing inputs and reducing client wait times by **3x**
- Tested and enhanced the **Java Spring**-based API, reducing response times by **15%** and increasing throughput for financial data processing
- Logged and resolved **20+** software defects, improving system reliability and client satisfaction

Payments Canada

May 2023 - Sep 2023

Software Developer Intern | Python, GCP, Google Apps Script, Google APIs

Ottawa, ON

- Automated file renaming for **300+** files using Python, saving **20+** hours monthly and streamlining record management for HR teams
- Developed a **Dayforce API** tool to automate employee probation updates, reducing the process time from **45+ mins** to **2 mins**
- Integrated **Google Cloud APIs** for data retrieval within spreadsheets, increasing reporting accuracy to **99%**

Technical Skills

Languages: Python, Java, HTML, CSS, C#, SQL, Dart, Swift

Technologies: Pandas, NumPy, Flask, Dash, Pytest, Firebase, Java Spring, .NET, PySpark

Tools: Git, Linux, Docker, Postman, GCP, Flutter, Azure, AWS, MS Fabric
